

Let Office Solutions help you green up your office for Summer!

According to the EPA, over 11 billion kWh, equivalent to \$935 million, would be saved if the 55 million office computers in the US used Energy Star power management controls. That's comparable to taking 1.5 million cars off the road or planting 2.5 million acres of trees!*

It's as easy as...

1

Call customer service to arrange for your office recycling program.

2

Office Solutions offers corrugated boxes for you to place your recyclables in.

3

When you are ready for a pick up just call customer service to schedule.

Yea...It's that easy!

Get Digitally Sustainable

- Look for products that meet credible environmental standards, such as EPEAT or Energy Star. Computers, printers, fax machines, and copiers should have an energy-saving "sleep" mode that kicks in automatically after a period of inactivity. Plus, less heat buildup and fewer operating hours means a longer lifespan for your electronics.
- Connect your office electronics to power strips and switch them off at the end of the day.
- Invest in Liquid Crystal Display (LCD) computer monitors as another great way to improve energy efficiency.
- Recycle old or outdated electronics.
Office Solutions can help you recycle: cardboard, paper, computers, cellphones, printers, batteries, tv's, and so much more!

Time to get sustainable > Office Solutions can help!!
